Work Experience

RamSoft Inc. **Apr 2023 – Aug 2026**
Senior Software Engineer | Remote *Healthcare SaaS / Radiology Platform*

- Owned end-to-end authentication and identity for a **multi-tenant** radiology platform using **React** and **Azure AD B2C** Identity Experience Framework; led the **migration of PIN-to-password** via feature-flagged rollout, achieving zero downtime and a **30% drop** in auth support tickets.
- Constructed an **AI-driven onboarding solution** that streamlined the SSO process in **under 3 hours**; integrated **OpenReplay and Datadog, improving observability** for troubleshooting production issues.
- Strengthened authentication security by remediating **origin-validation vulnerabilities**, implementing **OTP rate limiting** (est. $500–$2K/month in abuse costs prevented), and capped OTP validity at 300 s (80% smaller exposure window) resolving OTP race conditions to harden the authentication attack surface.
- Built Workflow Automation (WFA) tooling including a **custom serialized-state useUndoRedo React hook** enabling a **tree-structure UI experience** for over 500+ complex rule sets through drag-and-drop.
- Executed E2E test coverage across the codebase, converting **2 hours of manual QA per release into automated regression testing**; built a HIPAA-compliant audit-trail **"User Change History"** panel (MUI DataGrid, CSV/XLSX export) with full Jest/Storybook coverage.
- Structured critical **web component library** like import component including **file-type validation, sequential loading, in-tab navigation, upload-status handling, and user feedback for unsupported files**, improving reliability of medical-imaging workflows and **reduced code duplication by 30%.**
- Migrated the company website from WordPress to a headless CMS with Next.js SSR, SEO optimization, GDPR-compliant consent workflows, and **Framer Motion, Three.js, and Spline WebGL integrations**, driving a **15% increase in patient signups**.

Phable Care **Oct 2021 – Mar 2023**
Software Developer *Healthcare technology*

- Improved website performance to a **PageSpeed score of 98–100** through code splitting, image optimization, lazy loading, and server-side rendering in Next.js, enabling a **doctor appointment booking platform** to reliably support approximately **78–80 appointments/week**.
- Decoupled content management using Strapi headless CMS and **Programmatically generated config-driven pages** empowering marketing to modify listings and content for doctor profiles on the fly, **cutting update times by 75%** and reduced operational reliance on engineering teams.
- Designed high-impact e-commerce features across product, cart, and checkout flows, including customized product layouts, cart upselling, saved cart, cash closure, transactions, and return/refund workflows; integrated Google Tag Manager and Search Console for analytics and event tracking, **driving an estimated 8x increase in organic CTR** by improving keyword rankings from **Page 2 to the top 3 organic positions on Page 1.**

Varroc Engineering Ltd. **May 2021 – Oct 2021**
Software Developer (GET) | R&D / Electric Vehicles *Pune, India*

- Developed supervised **ML models** forecasting **Remaining Useful Life (RUL)** of Lithium-ion EV battery cells with an accuracy of 99% and worked on **JavaScript dashboards** to visualize battery-health data.

Technical Skills

Frontend & Programming: React, Next.js, JavaScript, TypeScript, Java, HTML, CSS/SCSS, Material UI, TanStack, Three.js, WebGL, Web Optimization

Backend, Security & Healthcare: REST APIs, GraphQL, Azure AD B2C, Microsoft Entra ID, HL7 FHIR, DICOM

Testing, Cloud & Tools: Jest, Cypress, Playwright, SonarCloud, Azure, Strapi, Figma, Datadog

Projects

COVID-19 Management Web App – React-based management dashboard for tracking and reporting. Used in real-time during the COVID-19 pandemic to monitor cases, manage patient records, and streamline workflows.

Nitrogen To-Do App – A no-nonsense, locally-run to-do list app with a clean UI for tracking tasks.

Education

Vellore Institute of Technology, Chennai 2017 – 2021
B.Tech., Electronics and Computer Engineering CGPA: 8.57/10

Achievements/ Awards

HACK RX'21 Winner – Bajaj Finserv's Healthcare Hackathon. | **TINKATHON Winner** – Hackathon by IIT Madras.
