Sashank Deb

Bengaluru, India | +91 73974 41915 | sashankdebrgu7@gmail.com | linkedin.com/in/sashank-deb

Summary

Software Engineer with 5+ years building and scaling user-focused applications. Led LCP optimization from 3.8 s to **under 800 ms**. Owned authentication for a multi-tenant radiology platform serving 50+ clients with zero downtime. Author of open-source npm library react-liquid-fill and AI mind-mapping app noodl.

Experience

Senior Software Engineer **Apr 2023 – Aug 2026**
RamSoft Inc. – Healthcare SaaS / Radiology Platform *Remote*

- Led a feature-flagged **PIN-to-password migration** on **React** and **Azure AD B2C**, cutting auth tickets by **30%**. Added **OTP rate limiting**, origin validation and a 300 s code expiry, saving est. **$500–$2K in monthly abuse**.
- Launched an **AI-driven SSO onboarding flow** completing setup in **under 3 hours**; integrated **OpenReplay** and **Datadog** for production tracing.
- Engineered **Workflow Automation** tooling with a custom serialized-state **useUndoRedo React hook**, enabling a drag-and-drop tree UI that manages **500+ complex rule sets**.
- Automated release regression testing with **end-to-end (E2E)** suites, **saving 2 hours of manual QA per release**; shipped a **HIPAA-compliant audit trail** with full **Jest** and **Storybook** coverage.
- Migrated the website from WordPress to **Next.js SSR** with a **headless CMS**, lifting **patient signups by 15%**.

Software Developer **Oct 2021 – Mar 2023**
Phable Care – Healthcare Technology

- Led a **team of 4 engineers** to raise a doctor appointment booking platform to a **PageSpeed score of 98–100** via code splitting, image optimization, lazy loading, and **SSR** in **Next.js**, supporting **78–80 appointments/week**.
- Decoupled content with **Strapi headless CMS** and config-driven pages, letting marketing update doctor profiles without engineers and **cutting update time by 75%**.
- Delivered e-commerce product, cart, and checkout flows (upselling, saved cart, returns/refunds) and integrated **Google Tag Manager** and **Search Console**, driving an estimated **8x increase in organic CTR**.

Software Developer (Graduate Engineer Trainee), R&D **May 2021 – Oct 2021**
Varroc Engineering Ltd. – Electric Vehicles *Pune, India*

- Developed **supervised machine learning (ML) models** forecasting the Remaining Useful Life (RUL) of lithium-ion EV battery cells at **99% accuracy**, with **JavaScript dashboards** for battery-health data.

Projects

- **react-liquid-fill** (npm library, React/TypeScript) – React component and hook that reveals icons, buttons and text with an animated liquid edge on hover, focus or scroll; **2.7 kB**, **zero dependencies**.
- **noodl** (AI mind-mapping app) – Turns a blank page into a full mind map, with **AI suggestions on every node** and **one-prompt generation**; near-zero-cost infrastructure keeps it **free**.
- **COVID-19 Management Web App** (React) – Dashboard to track cases and patient records, serving **100+ daily active users** during the pandemic.

Skills

Languages: JavaScript, TypeScript, Java, HTML, CSS/SCSS

Frameworks & Libraries: React, Next.js, Node.js, Angular, Vue, Redux, MUI, TanStack, Three.js/WebGL

Backend, Security & Healthcare: REST APIs, GraphQL, Azure AD B2C, Entra ID, SSO, HL7 FHIR, DICOM, HIPAA

Testing, Cloud & Tools: Jest, Storybook, Cypress, Playwright, SonarCloud, Azure, Datadog, CI/CD, Figma

Core Engineering: Agile, Web Performance Optimization, System Design, Data Structures

Certifications (HackerRank)

Frontend Developer (React) **React** **JavaScript (Intermediate)** **SQL**

Education

B.Tech., Electronics and Computer Engineering **2017 – 2021**
Vellore Institute of Technology, Chennai CGPA: 8.57/10

Awards

Winner, HackRx'21 – Bajaj Finserv healthcare hackathon | **Winner, Tinkathon** – Hackathon by IIT Madras
